SUMMARY

Recent B.E. graduate in AI and Machine Learning, skilled in Android development and Generative AI. Published researcher with hands-on experience in AI solutions. Proficient in Python, Java, and software development, seeking AI/ML Engineer or SDE-1 roles.

WORK EXPERIENCE

Android App Development Intern Using GenAI | MindMatrix.io Feb 2026 May 2026

Developed Android applications integrating Generative AI features and modern mobile development practices. Implemented API integrations and Firebase services for backend functionality and data management. Collaborated on application design, testing, and deployment activities. Improved application usability through UI optimization and feature enhancements.

PROJECTS

LipDecoder - AI-Based Lip Reading System March 2025 - Dec 2025

Developed an AI-powered lip-reading system that converts lip movements from live and recorded videos into text. Implemented computer vision and deep learning techniques for lip detection, feature extraction, and sequence prediction. Enabled multilingual text generation and optimized system performance for real-time usage. published a paper on "Lip Decoder: Converting Lip Movements to Text Using NLP and Deep Learning" in [IJCRT Journal], 2025.

Karunada Kala - Cultural Heritage Mobile Application Apr 2026-May 2026

Developed an Android application that promotes Karnataka's cultural heritage by connecting users with traditional art forms and local artisans. Integrated Firebase services for authentication, data storage, and content management. Implemented API-based information retrieval and intuitive UI workflows.

EDUCATION

10th - From **Narayana English Medium School**, Visakhapatnam in 2020 with **78%**.

12th - From **Jusco School Kadma**, Jamshedpur in 2022 with **80%**.

B.E(AIML) - From **Bangalore Technological Institute, Bangalore** in 2026 with **7.89** CGPA.

SKILLS

AI Technologies - Machine Learning, Deep Learning, NLP, GenAI.

Databases - MySQL, MongoDB

Technical Skills - Soft Skills, Team Leadership, Problem Solving, Communication, Project Management

Languages - Python, Java, C, JavaScript

Frameworks/Libraries - FastAPI, Streamlit, Pytorch, OpenCV, Firebase.

Tools - VS Code, GitHub, Jupyter Notebook, Google Collab.

CERTIFICATIONS

Cybersecurity MOOC - CySeck

Java Programming – Udemy

Machine Learning Algorithms - Simplilearn

Introduction to Generative AI - Simplilearn
